Custom Software Solutions

Our team can develop custom applications and solutions based on your business needs.

Industries of Focus:

- **Oil & Gas**
  - Exploration & Production
- **Pharmaceutical**
  - Research & Development

- **Healthcare**
- **Engineering**
- **Laboratories**

Full Cycle Software Development

- Design
- Implementation
- Documentation & Training
- Troubleshooting & Support

Project Tracking
- Timeline
- Budget & Finance
- Specific Metrics
- Data Management
- Personnel Tracking
- Reporting

Geophysics Exploration Software
- 3-D Modeling
- Seismic (Gravity/Magnetic) Modeling
- Mapping
- Technical Reports
- Exporting Graphs and Maps

Inventory Management
- Ordering
- Tracking and Notifications
- Department & Budget Reports

Data Management
- Archival
- Retrieval
- Reporting

Software / Network Evaluation

- Evaluate and audit current software and network setup
- Create plan to meet current requirements

Conversion Capabilities

- Convert Applications from outdated Visual Basic 6 (VB6) to VB.net
- Convert and Migrate databases from MS Access to SQL Server

Specializing in VB.net (Visual Studio), MS-SQL Server, HTML
